

APPLICATION FOR THE INCLUSION OF THE BE-76 AEROPLANE TYPE IN AIRCRAFT RATING OF A PILOT'S LICENSE (AEROPLANES)

PL 105AN

IMPORTANT

Before completing this form the notes of page 3 should be read carefully. Completed applications should be sent to the Civil Aviation Authority of Fiji, Private Mail Bag (NAP 0354), Nadi Airport, Fiji, together with the licence. Your attention is drawn to the provisions of the Air Navigation Regulations in respect of documents, records and the personal flying logbook.

SECTION 1	PERSONAL PARTICULARS OF APPLICANT (in BLOCK CAPITALS please)
Full Name (Su	rname first)
Licence Numb	er and type of licence
Address to wh	ich licence is to be returned
and telephone	number
SECTION 2	APPLICATION
	the BE-76 aeroplane included in the Aircraft Rating of my Pilot's Licence. I certify that the information is form is true to the best of my knowledge and belief. The following is also attached in support of this
Evidence	of a pass in the CAAF approved BE-76 aeroplane type rating examination.
Fees (Refer to	Civil Aviation (Fees and Charges) Regulation)
Type r	rating issue fee, and Flight test fee (if test conducted by CAAF Examiner)
Signature	Date
SECTION 3	DECLARATION OF TRAINING AND PROFICIENCY
demonstrated	has satisfactorily completed a course integrating ground and flying training on BE-76 aeroplane and has a satisfactory level of proficiency to Authorised Examiners in this aeroplane for the particular purpose in ified overleaf (the boxed items being completed on date) and in the following aspects of
3.2 Performane the rele	f all the equipment, fitted to this aircraft, which is the responsibility of the Flight Crew. ce of normal, abnormal, alternate and emergency drills appropriate to the Flight Crew duties as defined in evant Flight and/or Company Operations Manual. to carry out, at the systems panel of the aircraft, all normal in-flight procedures.
Signature	Date
Pilot in charge	of training for Company

4.1	BY DAY IN AN AEROPLANE IN FLIGHT F	OR THE	SPECIFIED	ITEM.		
4.1.1	Normal take-off and climb to circuit					
4.1.2	Visual circuit, approach with no glide slope guidance, and full stop landing. (See Note 1)					
4.1.3	Take-off with simulated failure of an engine					

4.1.4	With an engine simulated failed after takeoff, carry out an asymmetric circuit and landing. (See Note 3 & 5)							
4.1.5	Steep Turns To 45° AOB, 180° to left 180° to right							
4.1.6	In clean configuration and approach to stall (to stall warning), disengage auto-pilot and recover							
4.1.7	In landing configuration, stall (to nose down pitch) and recover							
4.1.8	Accelerate-stop with simulated engine failure immediately before V _{1.} (Note 3)							
4.1.9	Cross Wind Take-off and Landing							
4.1.10	Low Level Circuit							
4.1.11	Short Field Take Off and Landing							
4.1.12	Flapless Landing							
SECTION 5 FLYING EXPERIENCE								
I have had the following flying experience on the BE-76 aeroplane as recorded in my personal Pilot's Flying Logbook:								
5.1	Гуре Conversion training:	Aeroplane Hours						
Handling								
Signed Date

Name in BLOCK CAPITALS Licence no. and type								
GENERAL NOTES								

- 1. 'A circuit' is the flight path around an aerodrome at a specified height, which facilitates an aircraft's positioning from a point on the take-off path of a given runway to a point, on the approach path of the same runway, from which a landing can be made.
- 'Satisfactorily' means that the applicant is in full control of his aeroplane at all times, and that the successful outcome
 of a manoeuvre is never in doubt. 'Unassisted' means without verbal prompting or physical assistance with the
 flying controls.
- 3. In the aeroplane 'Simulated engine failure' means with throttle lever set to idle so as to represent a failed engine as nearly as possible. The accelerate-stop tests required by this Form should be carried out as follows:
 - In the aeroplane, simulated engine failure should be initiated at a **speed and height** which will not hazard the safety of the aircraft.
 - Simulated engine failure for abort drills should be initiated at a speed which is close to V₁ but which is sufficiently below to require a decision to stop, e.g. V₁ -5 or -10 knots.
- 4. Endorsement of the licence will date from the completion of these tests.
- 5. Only persons holding written authorisation from the Civil Aviation Authority of Fiji in respect of the aeroplane used for this test may sign for the satisfactory completion of any test on this form.
- This issue of CAAF Form PL105AN is for use in respect of all BE-76 aeroplanes. Copies of this form are available from the Civil Aviation Authority of Fiji, Private Mail Bag (NAP 0354), Nadi Airport, Fiji, telephone (679) 8923155 or may be downloaded from www.caaf.org.fj/index.cfm Forms & Downloads Personnel Licensing ApplicationAircraft Rating -PL 105AL.
